I'm Pritom Chakma, Passionate and dedicated **front-end developer** with a proven ability to craft interactive, user-focused web applications. Proficient in **React.js**, **Next.js**, **Tailwind CSS**, and **MongoDB**, I aim to leverage my skills to deliver seamless digital experiences. Excited to contribute to innovative projects while growing as a professional in the field of web development.

Technical Skills

Frontend: HTML5, CSS3, Tailwind CSS, JavaScript, React.js, Next.js

Backend: Node.js, MongoDB, Express.js

Soft Skills: Team Collaboration, Time Management, Adaptability

Projects

1. Medical Camp Management System :

[Live Preview](#) [Github](#) [Client - Server](#)

A web app to manage medical camps, allowing participants to register, view camp details, and make payments easily. Organizers can manage camps, registrations, and payments, while participants can track their history and leave feedback.

- Custom dashboards for participants and organizers to manage profiles, registrations, and feedback.
- JWT for secure access, Stripe for payment processing and transaction tracking.
- Mobile-friendly design with analytics to track registration data.

Technologies Used: React.js, Firebase, MongoDB, Stripe, JWT, Recharts, TanStack Query, Tailwind CSS

2. Volunteer Management Website :

[Live Preview](#) [Github](#) [Client - Server](#)

A user-friendly platform for managing volunteers, allowing users to post, update, and join volunteer opportunities with responsive design and secure database integration.

- Built a responsive Volunteer Management Website with secure login and real-time updates
- Easy navigation with search functionality and real-time updates for volunteering posts
- Seamless user experience with a responsive design and light/dark mode toggle

Technologies Used : Tailwind, React.js , Firebase, Node.js, Express.js , MongoDB, JWT

3. Chill Gamer:

[Live Preview](#) [Github](#) [Client - Server](#)

A chill and user-friendly game review platform where gamers can share, explore, and manage reviews, as well as save favorite games to a personalized wishlist.

- Game Reviews Management: Add, update, delete reviews, and view top-rated game
- Authentication: Secure email/password login, Google login
- Dynamic Watchlist: Save and manage favorite games, accessible only to logged-in users

Technologies Used : Tailwind, React.js , Firebase, Node.js, Express.js , MongoDB, JWT

Education

BSC in Computer science & Engineering
[Port City International University](#)
